

Pharma Machinery & Spares[©]

We serve you our trust...

Dear Sir / Madam

PHARMA MACHINERY & SPARES Is the Firm Engaged In Manufacturing

All Kinds Of Sieves And Screens Serving Pharmaceuticals, Chemical, Cosmetic And Food Industries Since Last 10 Years And Is Recognized By Its Commitment Towards Best Quality And Services To Its Clients.

It Serves All Major Pharmaceuticals, Cosmetic, Chemical and Food Industries and Has Its Own Head Office Located at Ahmadabad Gujarat and Manufacturing Unit & R & D Center in Odhav, Ahmadabad Gujarat. It Also Serves International Market and Is Indulged In Exporting To All Major Pharmaceuticals, Chemical, Cosmetic and Food Industries throughout the World

MILLING

MULTI MILL SCREEN

These are available in various Sizes including lab model. Most common size is 265mm diameter * 140mm Height available from 0.1mm to 25.0 mm hole diameter in perforation sizes below 0.5mm can be had in laser perforation know as Laser technology.

PULVERISER SCREEN

These are available in various sizes including lab model. The most common size is 175mm width * 480mm length available from 0.1mm to 25mm hole diameter perforation. The size below 0.5mm can be had in the laser perforation known as laser technology available with complete set of certificate.

CLITMILL SCREEN

These are available in various sizes. The most common size is 91mm width *426mm length available from 0.1mm to 25mm hole diameter perforation. The size below 0.5mm can be had in the laser perforation known as laser technology available with complete set of certificate.

CADMILL SCREEN

These are available in various sizes including lab model. The most common size is 150mm width *561mm length available from 0.1mm to 25mm hole diameter. In perforation the sizes below 0.5mm can be had in laser perforation known as laser technology available with complete set of certificate.

COMILL SCREEN

These are available in various sizes as per specification of machine available from 0.1mm to 25mm hole diameter. In perforation sizes below 0.5mm can be had in laser perforation also available in grater, square series.

TURBO MULTIMILL SCREEN

These are used in a single machine together available from 0.1mm to 25.0mm perforation. The size below 0.5mm can be had in the laser perforation known as laser technology available with complete set of certificate.

GRANULATION

**OSCILLATING GRANULATOR
SCREEN**

Theses are available in various sizes according to the machine size. The Most Common Size is 488mm width * 510mm length, available from 0.1mm to 25mm hole diameter, size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology, also available in triangular grater (TG) and spherical grater (SG) available with complete set of certificate.

SIFTING

SILICON MOULDED SIFTER SIEVES

These are available in various sizes from 12" to 48" diameter. The most common size used is 20" (550mm) & 30" diameter (750mm). The silicon is food grade quality, transparent in appearance. Non toxic & molded on the stainless steel ring. The mesh sizes varies from 04 mesh to 500 mesh with A.S.T.M. Standard being certified on 90x microscope with complete set of certificates.

Z TYPE SIFTER SIEVES

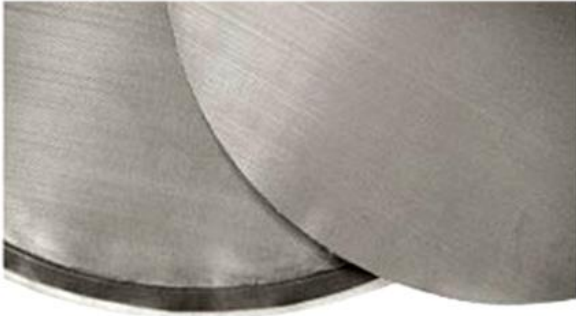

Available in various sizes from 550mm to 1200mm. Available in silicon moulding and also in static current passable sieve (S.C.P.S) design & also in stainless steel border. Sieves suitable for Sweco, Russell, Penwalt sifters & all Indian machine manufacturers.

**SPECIAL STATIC CURRENT
PASSABLE SIEVE**

These are available in various sizes from 12" to 48" Diameter, the most common size used is 20" (550mm) & 30" (750mm) S.C.P.S Polymer is available in light blue, dark blue & white colour with Static Current Passable properties of 10/7 to 10/8 ohms. The codification is done by laser machine on the periphery of sieve.

DRYING

F.B.D SIEVES

These are available in various sizes from 30kgs to 200kgs. Sieves used are dutch woven screen, hollender Screen. The most common sizes used is 24*110#. When product size is less 30*150 mesh and 40*200 mesh is used only round cut sieve is available and option of silicon moulding on the periphery is also offered. Available with complete set of certificate. Special sieve Static current passable sieves also available.

F.B.E DRYER SIEVES

These are available in various sizes from 125 Liters to 800 Liters sieves used are dutch woven screen, hollender Screen. The most common sizes used is 24*110# & 40*200 mesh is used. Only normal cut sieve is available & option of silicon moulding. On the periphery is also offered. Available with complete set of certificate. Special sieve Static current passable sieves also available.

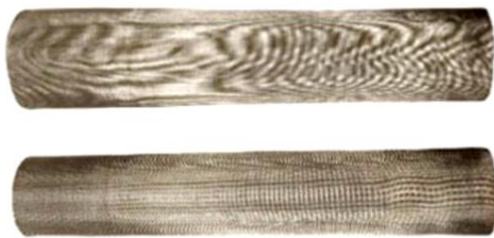

TEST SIEVES

These are available in various sizes 4", 8", 12", 18" & 24". The most common size is 8" diameter in brass & stainless steel frame from 04 mesh to 500 mesh. These are available with complete set of certificates.

HAND SIEVING FRAMES

These are available in various sizes & shapes commonly used is round or square shape used for hand filtration purpose or used on a container on drum. Also available detachable type sieving frame. Available from 4 mesh to 500 mesh, these are with complete set of certificates.

WIRE MESH

These are available in various sizes from 2 mesh to 600 mesh upto 10 microns. Different widths are available as per requirement, the most common width is 1 meter & 1.2 meters. Available with complete set of certificate.

We also manufacture Filter cloth and Demister pads.

ADVANCED SIEVES AND PERFORATED SCREENS TESTING KIT

siver and screen testing kit is available which contains densimeters, PIC Gauge, 8 x magnifier, with scale, 30 x magnifier, GO-No-GO gauge, also advance 90 x microscope with special measuring program available with complete set of certificates.

These are specially designed sieves where the user can retain the container and can change the sieves. when required, sieve is fixed between top and bottom portion with clamp, available in various size. 100% lead free design with complete set of certificates.
